## **CSI Factoring Launches Invoice Factoring Website**

*Denver-based commercial finance company now providing small businesses an alternative to traditional bank lending*

**DENVER, Colorado, October 26, 2010** – Last week CSI Factoring LLC (CSI Factoring) went live with its new invoice factoring website, [CSIFactoring.com](http://CSIFactoring.com). The financial services website offers detailed information about invoice factoring (also known as receivables factoring) and an online application for pre-qualification. Invoice factoring is a more expeditious way for companies to obtain working capital or to fuel growth. CSI Factoring will provide cash financing to companies across most industries including manufactures, distributors and service providers.

“With many banks reluctant or unable to lend to small and lower-middle market companies, invoice factoring is a dependable and beneficial alternative,” said CSI Factoring CEO, [Christopher A. Smith](#).

### **The Business Case for Factoring**

Balancing and forecasting cash flow is a challenge for any business and companies often wait 30-60 days to receive cash from its accounts receivables. When a business is facing unanticipated expenses or receivables are delayed, an immediate cash infusion becomes critical. [Invoice factoring](#) is a way for companies to secure funds without taking on additional debt. “By purchasing a company’s invoices and advancing up to 90% of the face value, CSI Factoring helps business owners meet payroll, pay taxes, satisfy debt, hire new talent and retain employees,” adds Mr. Smith.

### **Learn More and Apply Online**

[Factoring applications](#) are typically reviewed and approved in one business day. There are no long-term contracts or hidden fees associated with the service. Businesses interested in learning more about CSI Factoring can visit [www.csifactoring.com](http://www.csifactoring.com).

###
